**KPOP CTZEN PROJECT**

KPOP CTzen is an X2E ecosystem-creating project based on the K-Cultural IP led by the participation of the holders.

KPOP CTzen's NFT allows the secondary work of using its Persons. Through this, the holders can freely let their imagination run wild, and at the same time, enables the community and audience to empathize with each other.

To successfully achieve our goal, KPCT project supports the holder's IP business through Rowoon Labs' unique NFT launchpad. The story made together by holders will enable the infinite expansion of the KPOP CTzen universe and create the 2E(To Earn) ecosystem through the participation in X2E platform.

Such as frequency and point, we were already engaging with 2E in real life. KPCT's WLB platform will provide users the opportunity to gain profit from various activities in an ecosystem with balanced supply and demand.

KPOP CTzen project creates an X2E(Everything To Earn) platform consisted of L2E(Listen To Earn), C2E(Create To Earn), S2E(Social To Earn), and so on.

Our first approach is launching an L2E radio APP and stepping into the metaverse by utilizing C2E for Making KPOP CTzen IDOL with the holders.

예를들어 A유저가 자신의 SNS를 홍보하기 위해 팔로워에 대한 SSP 보상을 퀘스트로 등록할 수 있고 링크 클릭에 보상을 제공하는 배너를 신청할 수도 있습니다.
